PROFESSIONAL SUMMARY

Computer Engineering student (CGPA: 8.96/10) with production software engineering experience building full-stack, cloud-based, and AI-enabled applications. Experienced in developing web applications, backend services, third-party integrations, and real-time systems. Strong foundation in C++, data structures, algorithms, and core computer science concepts.

EDUCATION

Vishwakarma Institute of Technology

Bachelor of Technology in Computer Engineering; CGPA: 8.96/10

Pune, India

Aug. 2023 – May 2027

EXPERIENCE

Full Stack Developer Intern

Feb 2026 – Present

Pinevor

Remote

- Developed and enhanced production web applications across healthcare, customer portal, and business platforms by building React-based interfaces, REST APIs, and backend services on AWS.
- Built AWS serverless workflows for authentication, notifications, and business processes, integrating third-party healthcare and payment platforms.
- Configured GitHub Actions workflows for automated build and deployment processes and supported Linux-based production environments.
- Diagnosed and resolved production issues across backend services, cloud infrastructure, and third-party API integrations, improving application reliability and operational stability.

PROJECTS

SocialFlow – Social Media Automation Platform | [GitHub](#) | [Live Demo](#) | *MERN, TypeScript, Zernio API, Gemini, Cloudinary*

- Built a full-stack social media automation platform for creating, scheduling, and publishing posts through integrated social accounts.
- Implemented Zernio-based OAuth and publishing workflows with account validation, media handling, scheduled-post management, and publishing status tracking.
- Developed an automated scheduling pipeline using Node.js cron jobs and integrated Gemini for AI-assisted content generation.

AI-Powered Smart Classroom Platform | [GitHub](#) | *React, Node.js, Python, Whisper, Gemini, MongoDB*

- Built an AI-powered classroom platform for lecture recording, near-real-time Whisper transcription, and AI-generated learning content
- Processed transcripts asynchronously with Redis and BullMQ to generate summaries, quizzes, flashcards, and embeddings using Gemini for RAG-based lecture Q&A
- Added Razorpay billing, credit wallets, usage tracking, and role-based access for teachers, students, and administrators

Patent Analysis using PatentBERT | *Python, PatentBERT, NLP, Transformers*

- Developed a transformer-based NLP pipeline for multi-class patent classification and semantic similarity analysis using domain-specific representations
- Fine-tuned PatentBERT on public patent datasets and built a semantic retrieval pipeline to identify and rank similar patents using contextual embeddings

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Web & Backend: React.js, Node.js, Express.js, REST APIs

Cloud & DevOps: AWS (Lambda, Cognito, SES, IAM), Docker, Git, GitHub Actions, Linux

Databases: MySQL, MongoDB

AI & ML: Machine Learning, Generative AI, RAG, NLP

ACHIEVEMENTS

Patent Published – *Marine Buddy: Autonomous Oil Collection System* (Application No. 202521032527)

Kurukshetra Hackathon Finalist – 24-hour national-level hackathon organized by Mozilla Club, MIT ACSC

LEADERSHIP & EXTRACURRICULAR

Management Secretary & Event Coordinator, Ekasutram (2024 – 2026)

Multimedia Coordinator & NSS Volunteer, Social Welfare and Development Committee (2024 – 2025)

Database Coordinator, SIG RealitySpectra (2023 – 2024)
